TANMAY PAREKH

@ tparekh@cs.ucla.edu https://tanmayparekh.github.io/ linkedin.com/in/tanmayparekh/

EDUCATION

University of California Los Angeles (UCLA)
Doctor of Philosophy in Computer Science
2021-Ongoing 4.0/4.0

Carnegie Mellon University (CMU)
Master of Science in Language Technologies
2019-2021 4.02/4.0

Indian Institute of Technology Bombay (IITB)
B. Tech with Honors in Computer Science & Engineering
2014-2018 9.37/10

RESEARCH PROJECTS

DOMAIN-AWARE DATA GENERATION FOR ZERO-SHOT INFORMATION EXTRACTION (ONGOING)

- Utilizing LLMs to generate data for information extraction tasks to train fine-tuned downstream models
- Exploring reference-based and finetuning based methods to adapt the models to various ontologies across four different domains of news, social media, biomedical, and wikipedia.

CONTEXTUAL LABEL PROJECTION FOR CROSS-LINGUAL STRUCTURE PREDICTION

- Utilized instruction-tuned language models to perform contextual machine translation to tackle cross-lingual label projection
- Improved translate-train for Event Argument Extraction (EAE) and NER by 1-2 F1 points for 39 languages
- Considered for **best paper at NAACL 2024**

EVENT EXTRACTION FROM SOCIAL MEDIA FOR EPIDEMIC PREPAREDNESS

- Created the first Event Detection dataset SPEED for extracting events for epidemic preparedness from social media
- Demonstrated the generalization of our framework by providing early epidemic warnings for the three unseen epidemics

BENCHMARKING GENERALIZABILITY FOR EVENT ARGUMENT EXTRACTION

- Created a diverse and comprehensive ontology with 100+ event types and argument roles using expert human annotations from a semantic role labeling dataset FrameNet
- Proposed a dataset GENEVA along with four different benchmarking setups to test the generalizability of models

TOWARDS BUILDING CODE-SWITCHING CHATBOTS

- Proposed a generalized goal-oriented multilingual dialogue framework that elicits code-switching
- Experimented with various agent strategies to study user behavior. Discovered various insights about users' code-switching patterns, personal bias, and linguistic accommodation

STYLE TRANSFER FOR POLITENESS

- Introduced the task of politeness transfer and discussed the pecularities involved in the task
- Proposed a tag and generate approach beating the state-of-the-art techniques in automatic and human evaluation

SKILLS

Programming: Python, C++, Bash, R, MATLAB, Java
Frameworks: Pytorch, Tensorflow

ACHIEVEMENTS & ROLES

- Served as the **Program Chair** at the Socal NLP Symposium '23
- Received the **UCLA Computer Science Fellowship** providing sponsorship for 2021 – 2022
- Represented CMU at Alexa Socialbot Challenge 2020 and reached the **Semifinals**
- Received **ISCA Student Grant** at Interspeech '18
- **Teaching Assistant** for 8 undergraduate and graduate courses

INDUSTRY EXPERIENCE

Applied Scientist Intern — Jun '22 – Sep '22
Amazon (Alexa AI Team)

- Explored the alignment of higher order semantics (like negation) across languages in multilingual models
- Showed the effectiveness of our alignment technique on related downstream tasks like sentiment analysis

Applied Scientist — Jul '18 – Jun '19
Amazon (Machine Learning Team)

- Worked on the problem of product attribute extraction from the product page titles without using human supervised data. Modeled it as a NER task
- Proposed use of semi-supervised learning and regularization techniques to learn from partially labeled data

Other Interns: Goldman Sachs (2017), Philips (2016), Edelweiss (2015), Sportz Interactive (2015)
